Infection Control Annual Statement 2023/2024

Purpose

The annual statement will be generated each year. It will summarise:

- Any learning connected to cases of *C. difficile* infection and *Meticillin-resistant Staphylococcus aureus* blood stream infections and action undertaken.
- The annual infection control audit summary and actions undertaken.
- Infection Control risk assessments and actions undertaken.
- Details of staff training (both as part of induction and annual training) with regards to infection prevention & control.
- Details of infection control advice to patients.
- Any review and update of policies, procedures, and guidelines.

Background

University Medical Group Reading Medical Practice/Surgery and Whitley Villa Surgery, Lead for Infection Prevention / Control is Sarah Langley Practice Nurse Lead, who is supported by Sarah Jackson, Practice Nurse.

This team keeps updated with infection prevention & control practices and share necessary information with staff and patients throughout the year.

Significant events:

Detailed post-infection reviews are carried out across the whole health economy for cases of *C. difficile* infection and *Meticillin Resistant Staphylococcus aureus* (MRSA) blood stream infections. This includes reviewing the care given by the GP and other primary care colleagues. Any learning is identified and fed back to the surgery for actioning.

This year the surgery has been involved in 0 *C. difficile* case reviews and 0 MRSA blood stream infection reviews. Feedback has included:

Audits:

Detail what audits were undertaken and by whom and any key changes to practice implemented as a result.

Audit	Date	Auditor/s	Key changes
Infection Prevention	25/01/24	Sarah	Email sent to staff.
Control and Efficacy		Langley	
		Practice	Sharp boxes gentle closure
		Nurse Lead,	Laminating posters for
		Sarah	notice boards
		Jackson	New signage for clinical bins
		Practice	as looking worn.
		Nurse and	Clinical waste bins for
		Kayla Pitt	cleaning
			De cluttering reminder email

		(care co- ordinator	
Hand Hygiene	November 2023	Sarah Jackson	Spot checks completed 25/01/24 by Sarah Langley
ANTT	Planned	Sarah Langley	
National Standards of Healthcare Cleanliness Technical	January 2024	Sarah Langley and Sarah Jackson	

Infection Control Risk Assessments:

Regular Infection Control risk assessments are undertaken to minimise the risk of infection and to ensure the safety of patients and staff.

Staff training:

No. approxiamately 7 new staff joined this Medical Centre/Surgery in the past 12-months and received infection control, hand-washing, and donning and doffing training within 4-months of employment.

92% of the practice patient-facing staff (clinical and reception staff) completed their annual infection prevention & control update training (specific whether this was in a formal training session or online).

97% of the practice non-patient-facing staff completed their 3-yearly/annual infection prevention & control update training.

The IPC nurse/practitioner attended training updates for their role. Training is provided by the BOB ICB Webinars.

Infection Control Advice to Patients:

Patients are encouraged to use the alcohol hand gel/sanitiser dispensers that are available throughout the Medical Centre/Surgery. Additional IPC measures on hands, face, space have been implemented due to the COVID-19 Pandemic.

There are leaflets/posters available in the Medical Centre/Surgery -regarding:

MRSA	Chickenpox & shingles	
COVID-19	Norovirus	
Influenza	Recognising symptoms of TB	
The importance of immunisations (e.g. in childhood and preparation for overseas travel)		

Policies, procedures, and guidelines.

Documents related to infection prevention & control are available to all and reviewed in line with national and local guidance changes and are updated 2-yearly (or sooner in the event on new guidance).

CQC policies are updated yearly and republished if changes are made
